

Did you know that more pollution is generated during production of the catalytic converter, then it could prevent in its lifetime?

Scrap catalytic converters remains a greatest urban mine of recyclable platinum group metals. Converting knowledge into action is what we do. Combining arc smelting technology with scrap collection expertise to your benefit.

RANGE OF METALS :

Pt
Platinum

Pd
Palladium

Rh
Rhodium

- Our logistic team is making sure that collection of your material shall be hassle free, no matter of your location or quantity of converters.

- Witness to control. Inspect sampling operations at Lekon's refinery.
- More comfort on a safe side? Get your catalyst tested with independent assayers.
- Request inspection photo report of your material being sampled.

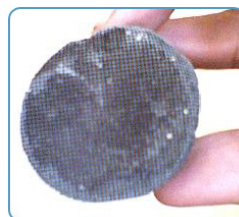

- Express multi currency settlements.
- Have your own weather-proof insurance. When the market becomes stormy, hedge your valuable metal assets trading.

Handling electric arc 24/7 since 2009. Elegant by design, efficient by operations, Lekon's smelting technology benefits in 3 following concepts:

- 1 **LOW TREATMENT CHARGES**
- 2 **HIGHER PRECIOUS METALS RECOVERY RATES**
- 3 **PROMPT METAL RETURN TIME**

Don't waste your converters grading. Value it by precise metal content.

When in doubt, don't. Instead send in your sample for free analysis.
